

Plivasept

antibiotic shampoo

Content

Detergent antiseptic for hands and skin contains antiseptic chlorhexidine. 100 ml of a solution contains 4.5 g of chlorhexidine digluconate (CHX).

Use

- Non-diluted: can be on the skin of the animal/person for max 20 minutes. Afterwards it should be washed down very well.
- Diluted 1:10: can be used on the problematic area without washing down.
- As a regular not-every-day dog-cat-human schampoo (preventive).
- As a cleaning-disinfecting agent for floor, furniture, cat litter, peed areas etc.

Problematic areas

- small wounds, scratches
- allergic areas
- itchy areas
- hot spots

How it works

It does not prevent allergies, but it prevents the development of bacteria in the small wounds and skin and thus prevents infections and further complications. (www.zdravahranazapse.si)
